September 30, 2014

Location:

*Lake Perrault 3 miles
south of Painesdale*

Time:

10:15 AM-2:30 PM

RSVP:

Mrs. Cindy McCormick
mccormickc@adams.k12.mi.us
(906) 482-0599

What is a BioBlitz:

The BioBlitz is a short (usually one-day) community event that is meant to inventory and monitor biodiversity in an area. Our BioBlitz will be conducted at Lake Perrault and the Brown Nature Sanctuary. Scientists from the local area will be on hand to help Jeffers High School students, teachers, and community members identify aquatic and terrestrial organisms. This is the first BioBlitz to be conducted at this site. It will provide baseline data to help us better understand these unique ecosystems and help in the future monitoring efforts.

We hope you can join us!
