FEBRUARY 17, 2022 EYES ON THE LAKE

4:30-6:00 PM

Virtual Session Only - link will be provided to registrants

Want to know more about how technology enables scientists to predict weather and wave conditions on the Great Lakes?

This online session will:

- Explore current MTU research supporting recreational boating, shipping, and ferry operations in the Great Lakes through an observational weather buoy network
- Engage participants in understanding how buoy and weather data is collected, why it is important, and how data can be used in the classroom.
- Share teaching resources and data sources related to Great Lakes observations.

For more info contact: ecvye@mtu.edu

PRESENTERS:

DR. JOHN LENTERS
Research Scientist
Great Lakes Research
Center, MTU

DR. ERIKA VYE
*Geosciences Research
Scientist*
Great Lakes Research
Center, MTU

EMILY GOCHIS *Director,*
**Western UP MiSTEM
Network**

~~~~~

Funding provided by the Great  
Lakes Observing System.

Session facilitated by the Lake  
Superior Stewardship Initiative and  
the Western UP MiSTEM Network
