

# Geoheritage: Connecting Geology, Legacy Mining Waste, Climate Change, and Food Sovereignty

- One institute - attend one, two or three days!
- Place-based, Watershed Literacy, and Multidisciplinary Learning
- FREE for Western U.P. K-12 Educators
- Limited - 15 participants each day (Preference given to teacher teams)
- SCECHs (up to 7 each day)
- Lunch provided
- [REGISTER HERE](http://lakesuperiorstewardship.org) Or at <http://lakesuperiorstewardship.org>

## June 22 – Buffalo Reef & Gay

Explore the source and impact of legacy mining waste on land, culture, and other beings, including vital white fish and lake trout spawning grounds (includes an excursion on the RV Agassiz).

## June 23 - Sand Point, Baraga

Learn about KBIC's community-based shoreline restoration work at this culturally significant place - the site of KBIC Pow Wow grounds, wild rice beds, and fitness trails within the 14-acre restoration site.

## June 24 - KBIC Peoples' Garden, L'Anse

Learn about Indigenous foodways, food sovereignty, honorable harvest, and the importance of reciprocal partnerships during this combined day of learning and service.

### Presenters:

Karena Schmidt, Ecologist  
KBIC NRD  
Erika Vye, Geoheritage Specialist,  
GLRC, MTU  
Others TBA

Funding provided by: Native American Heritage Fund, NOAA B-WET, Michigan Space Grant Consortium, & the Western UP MiSTEM Network. The Summer institute is facilitated by the Lake Superior Stewardship Initiative with the support of area teacher experts.
